✂chayns®-toolkit

A zero-config toolchain for developing chayns® apps.

LICENSE **MIT**   NPM **V2.0.9**   LAST COMMIT **MAY 2023**

chayns-toolkit contains pre-configured tools for the development, publishing and quality assurance of your app. It was

created to simplify the development experience when working with React.

> This toolchain is specialized in developing apps and plugins for the chayns® platform. If you want to develop a general purpose web app, take a look at Next.js.

❯ Getting Started

For the easiest way to start a new chayns® project with chayns-toolkit check out `create-chayns-app` .
